Hassan Sultan
Newsletter Chair
President 2011-2012
ASHRAE Qatar Oryx

As we all know that the ASHRAE logo was created in 1959 when the American Society of Refrigerating Engineers and the American Society of Heating and Ventilating Engineers merged to form ASHRAE.

HVAC&R industry for standards, education and others has progressed to incorporate many developments in building design, construction and operation and as these changes has taken place, ASHRAE has changed as well to include an enhanced logo, a new tag line and a change to using only its acronym.

The announcement for the change was made at Society's 2012 winter conference held at the palmer house Hilton in Chicago.

ASHRAE'S Original Commitment to HVAC&R engineering excellence remain resolute as the Society continues to expand.

Shaping Tomorrow's
Built Environment Today

www.ashrae.org

ASHRAE is pleased to unveil a redesigned website. With this redesign comes better navigation, a better search engine and better tracking, all of which will help you find the information you need to support you in your job, whether that's your role in the industry or ASHRAE.

INTERVIEW

The idea of the interview has been proposed and managed by the President Hassan Sultan in order to obtain the evaluation & assessment of the ASHRAE members on the chapter's advancement and future prospects.

Q1. How do you see ASHRAE is advancing HVAC&R serving the humanity and promoting towards sustainable world?

A1. ASHRAE is the engine of advancement in HVAC and peripheral sciences and engineering, including electricity, hydraulics, environment, and architecture. The Scientific advancement survival of Architectural Engineering is on the shoulder of ASHRAE. Creation of better habitable environment have created more stable societies, due to file satisfaction level.

Q2. How do you see ASHRAE as a learning institute?

A2. ASHRAE is a university without boundaries, no locality and limits of subjects. The disinterested contribution of its members have created this enormous and dynamic society for learning, standards, comfort awareness that is influencing all fields of sciences in formulating solutions. ASHRAE science should be accessible to all ages and any interest because it contributes to human existence in quality.

Q3. Where are you in ASHRAE and how do you see your future?

A3. ASHRAE experience will continue prevailing the HVAC engineering and related fields and expanding beyond. The heat transfer principles implementation in Designing longer life LED lights and electronic components, is the by-products of HVAC&R experience at microscale.

Q4. ASHRAE Qatar Oryx Chapter (AQOC) is one of the active chapter in the region at large, any advice for better achievement?

A4. AQOC has placed Qatar on the ASHRAE map. Here we should initiate in comprehensive research programs of applications that are specific to the Country and the region.

Chapter Officers activities:

President Hassan Sultan and Vice President Subrata Kar had an active Participation in the ASHRAE RAL Planning Committee meeting where it took place on January 23rd, 2012 at Hotel Palmer House Kimball.
